## BRING YOUR VISION TO LIGHT

***Effective landscape lighting requires a combination of solid design skills, technical knowledge and thorough planning. Light on Landscape's designs use the artistry of light to stretch the boundaries of spatial fantasy – creating enticing shadow play, movement, patterns, colours and textures while covering all the necessary practical and technical functions.***

Outstanding landscape design is always aided by strong relationships with trusted suppliers; ones that give you access to superb quality fixtures and have the technical expertise to understand what you need. With over 30 years' experience, Light on Landscape can provide targeted solutions to showcase your design and reduce project time. Our designers and technicians will source reliable materials appropriate to your project, and back it up with a guarantee of satisfaction.

Landscape Designer: Garden Design Studio

### ***Design to suit your needs***

Light on Landscape is a trusted collaborator within the design community because we have the expertise and innovation to help a project succeed. Our design team can consult on all facets of landscape lighting design, and our technicians advise on the best solutions for the environment you are creating. Whether you're highlighting a garden feature, or just adding depth to an under-utilised space, we can give you helpful advice, and supply what you need to produce a stunning garden environment.

***Whatever level of design involvement you choose, your project remains in your control; think of us as an indispensable resource, providing professional support if and when you require it.***

### ***Extensive range, sound advice***

Light on Landscape's extensive industry experience means we are available for advice on content, in addition to materials. We have a thorough knowledge of our lighting solutions – their purpose, applications, technical specification and design benefits. We advise and service all aspects of the design process, and work with designers to achieve the best possible design outcome.

Our showroom houses a wide product range including wall lights, step lights, accent lights, path lights, underwater lights, spread lights, in-ground lights and LED lights. To help us with your enquiry, we suggest you make an appointment and bring your plans with you.

***“We are very pleased to rely on Light on Landscape's sensitive aesthetics to carry through our visual concepts of outdoor space lighting. With Light on Landscape there is no compromise to the integrity of our design and they also interpret our understated approach to lighting. We look forward to working with them on future designs and appreciate their professionalism in a discipline that is not often given its true value.”***
