SUPPLY

IMPROVE YOUR SUPPLY CHAIN WITH LIGHT ON LANDSCAPE

Strong supplier relationships are crucial for successful landscape lighting design. Prompt and reliable supply of materials helps a project stay within budget and on time as well as allowing designers to focus on core profitable activities.

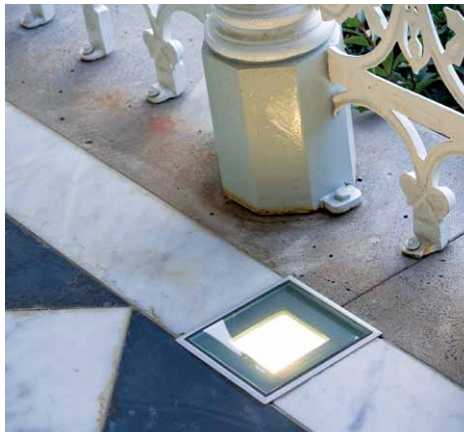

Light on Landscape has been a trusted supplier to the Landscape Design industry for almost 10 years. Our expert knowledge of all products we supply, coupled with over 30 years' lighting design experience guarantees we can supply stunning lighting solutions for your project, and make sure it arrives when you expect it to.

Quality products for a competitive price

Light on Landscape stocks an extensive range of lighting and ancillary products including a variety of lighting, transformers, cabling and accessories. In other words, we can supply anything you need for a lighting project, including:

- Light fixtures - a wide variety of affordable quality fixtures. And if we don't have it we can source it for you
- Cabling - direct and burial UV-stabilised exterior cable including specialty items
- Voltage transformers - 12 and 24 volt AC & DC electronic, iron-core, toroidal, burial and weather-proof and interior.
- Lamps to suit all exterior lighting fixtures
- Lanterns custom built to your design specifications
- LED lighting and drivers

At Light on Landscape, we are mindful of lighting running costs, energy consumption and environmental issues. We keep abreast with the latest technologies in energy-efficient lighting, particularly with LED systems.

“When creating gardens, I am always conscious of how they can be enhanced at night through the process of garden lighting. My expectations for the quality of the garden are always very high and this is equally so for the lighting of the garden. I work closely with Light on landscape on projects all over Australia to fulfill this objective. Their dedication and skill makes the process easy and fulfilling.”

Paul Bangay

Sound advice from industry experts

Our staff are experienced in all facets of outdoor lighting design. Just tell us what you need, and what mood you are trying to achieve and we will help you make an astute selection. And if you do decide to order, part of our service to you is to accurately estimate your requirements, so you only order what you need, saving money on your project overheads.

Safe, reliable service

Effective landscape lighting requires a combination of solid design skills, technical knowledge and thorough planning. With designers and tradespeople on staff, we can take you through anything you need to know about a product, whether visual or technical, without obligation.

Many of the systems and lighting features can be shown in-store, so you can be sure that your choice is right for the design. For added peace of mind and for a small fee, we can even evaluate your needs on-site or from visuals or plans, and tailor your lighting solution based on the environment in which they will feature. Our aim is to assist you sourcing the right materials for your project and allow you to focus on the garden dynamics.
